书面表达

五、文段表达

39. 参考范文:

题目①

Dear Peter,

I'm glad to receive your email. The online course is about papercutting. I think it's

a fabulous art form. We can create anything, from simple graphic design, to detailed three-dimensional images.

First, we need to log in to our school website and choose the course “papercut art”. Then, we should watch a video about the history of Chinese handicrafts. After watching it, we can read posts and take part in online discussions. To complete the course, we are also required to hand in a poster and stick our papercuts onto it.

You’d better buy a craft knife and some thick paper before taking the course. And you can also start collecting some interesting papercut designs.

If there is anything more that I can help with, please let me know.

Yours,

Li Hua

题目②

During the past two months, I had a good experience after deciding to begin self-directed learning. First, I made full use of online courses. In the morning, I attended the live broadcast classes via a “cloud platform” on our school website. To keep myself focused and engaged, I raised questions and took part in discussions. Moreover, I made my own learning goals. For each subject I had a weekly plan about things to do and then I broke big projects down into small tasks. After crossing them off of my to-do list, I felt so great.

Self-directed learning requires time management and willpower. I learned to explore online resources, set goals, stick to plans, and monitor progress all by myself.
