in England, people often talk about the weather because they can experience(经历) four seasons in one day. In the morning the weather is warm just like in spring. An hour later black clouds come and then it rains hard. The weather gets a little cold. In the late afternoon the sky will be sunny, the sun will begin to shine, and it will be summer at this time of a day.

In England, **people can also have summer in winter**, or have winter in summer. So in winter they can swim sometimes, and in summer sometimes they should take warm clothes.

When you go to England, you will see that some English people usually take an umbrella or a raincoat with them in the sunny morning, but you should not laugh at them.

What is color? Why do some of the things around us look red, some green, others blue? Colors are really made by reflected(反射) light. We see colors because most of things reflect light. Something is red, for it reflects most of the red light. In the same way, if something is green, it reflects most of the green light. If something reflects all light, it is white. Some of the light is reflected and some is taken in (吸收) and turned into heat(热能). The darker the color is, the less light is reflected, and the more light is taken in. So dark-colored clothes are warmer in the sun than light-colored clothes.
