阅读短文，根据短文内容回答问题。

All over the world people enjoy sports and take part in different kinds of sports. Sports help to keep people healthy and happy, and to live longer.

Many people like to watch others play games. They buy tickets or turn on their TVs to watch the games. Often they get very excited when "their" player or team wins.

Sports change with seasons. People play different games in winter and summer. Swimming is more comfortable in warm weather, but skating is more fun in winter.

Sports and games often grow out of people's work and everyday activities. The Arabs use horses or camels in much of their daily life. They use them in their sports, too. It is the same with people in Xinjiang. Millions of people hunt and fish for a living, but hunting and fishing are very good sports, too.

Some sports or games go back thousands of years, like running or jumping. Chinese Wushu, for example, has a very long history. But basketball and volleyball are rather new. Neither one is a hundred years old yet. People are inventing new sports or games all the time. Water-skiing is one of the newest in the family of sports.

People from different countries may not be able to understand each other, but after a game together they often become good friends. Sports help to train a person's character. The more you do sports, the healthier and happier you become.

34. Do people all over the world enjoy sports?
35. What do sports change with?
36. Where do sports and games often grow out of?
37. What sports do you often do? What can you get from doing the sports? (Give at least two good points.)
