**Seed (种子) of Kindness**

Jim, a successful businessman, told the experience of his childhood.

When he was 12, his parents died. He was alone and didn't get on well with others. People always laughed at him. No one showed kindness to him.

His only friend was a dog named Tige. He gave his dog enough to eat and drink, but sometimes he was not polite to it. He didn't know that an unkind work sometimes could cut one's heart like a knife.

One day as he walked down the street, a young lady was walking in front of him. Suddenly one of her bags dropped from her arms. As she stopped to pick it up, she dropped other bags. He came to help her. "Thank you, dear! You are a nice little boy!" she said kindly, smiling.

A special feeling came to him. These were the first kind words he had ever heard. He watched her until she went far away, and then he whistled (吹口哨) to his dog happily and went directly to the river nearby.

"Thank you, dear! You are a nice little boy!" he repeated the woman's words. Then in a low voice he said to his dog, "You are a nice little dog!" Tige raised its ears as if it understood.

"Uhum! Even a dog likes it!" he said, "Well, Tige, I won't say unkind words to you anymore." Tige waved its tail happily.

The boy thought and thought. Finally he looked at himself in the river. He saw nothing but a dirty boy. He washed his face carefully. Again he looked. He saw a clean nice boy. He was amazed. From then on, he had a new life.

Is your TV connected to the Internet? What about your chair or your fridge? It is possible that they are not. But in the future, most things in your home may be connected, as the so-called “Internet of things” is developing.

The Internet of things may be coming sooner than you think. It is reported that during his speech earlier this year, Samsung (三星) CEO BK Yoon spent a lot of time talking about the Internet of things. He said that five years from now, every Samsung product will be part of the Internet of things, whether it's a washing machine or a vacuum cleaner(吸尘器).

So, how do household(家用) objects that are part of Internet of things work? Well, think of a usual chair. When connected to the Internet, the chair warms up when it knows that the user has just walked into the room and is feeling cold.

An Internet-connected camera, like a smart-home camera, could help people feel safer in their homes. It can recognize people's faces, and even can see when someone passes by in the dark. Then it can send you a message on your smartphone to let you know who's there. If the person is someone you don't know, it can tell you that, too.

But according to MIT Technology Review, whether companies are connecting dog food bowls or security (安全) systems to the Internet, there may be problems. For example, many early connected-home devices (装置) don't have much built-in security, which means they could be hacked (被黑客攻击). In addition, it could be difficult to get these devices to work together because they are made by different companies. To fight this, many companies have joined the Open Interconnect Consortium, which had 45 members by late 2014.

So, picture this: you walk in through the front door of your home. The temperature changes to make you feel comfortable after a long day at school. Your favorite music starts playing for you. Do you think that this would be a good thing? It may happen sooner than you think.

53. The Samsung CEO's speech is mentioned to prove that\_\_\_\_\_.

  - B. Companies have difficulty connecting security system to the Internet.
  - C. Connected-home devices may not work together and can easily get hacked.
  - D. Companies which produce connected-home devices haven't joined together.
55. What is the main idea of the passage?
- A. How to product the Internet of things.
  - B. The way of connecting the Internet of things.
  - C. The introduction to use the Internet of things.
  - D. The Internet of things is coming in the future.

### A Famous Writer

In her speech to Harvard students in 2008, J.K.Rowling said, "...seven years after my graduation day, I had failed on an epic scale."She went on to say that "by every usual standard, I was the biggest failure I knew."

It might surprise some readers to know which period of her life J.K.Rowling was talking about here. She is talking about her life when she was writing the first novel of the *Harry Potter* books. The idea came to her during a train ride in 1990. In December that year, her mother died. The next few years were difficult for her. In 1993, her first but short marriage ended. She didn't have much money and life was not easy. As she said in that same speech, "That period of my life was a dark one and I had no idea that there was going to be...a kind of fairytale resolution."

As we all know now, the *Harry Potter* books went on to become extremely successful and also made her very rich. So where does think this success came from? She thinks it is a direct result of her early failures. As she went on to say, "Failure meant I stopped pretending to myself that I was anything other than what I was and began to direct all my energy into finishing the only work that really mattered to me... I was set free. "

Her *Harry Potter* series was completed with its final book in 2007. The books have become a very successful film series and three years after the final book was published, a *Harry Potter* theme park opened in the United States. She has written other books related to the *Harry Potter* series and her first book for adults was published in 2012. She has also remarried and now has three children.

It's very important for teenagers to read. Reading is not just important while teens are in school; good reading skills are also important to future success in the workplace. If you are a teenager who has lost interest in reading or never liked it much, here are some ways to encourage you to read.

First, find an example. There must be some persons around you who like reading for pleasure. Try to learn from them and copy their behaviours.

Second, prepare your room with different kinds of books. Leave them around so that you can pick up a book whenever you like.

Third, give yourself a certain time to choose your own books. When you are out, make sure to go to a bookstore, and probably you can make your own collection of books later.

What's more, build on your interest. Look for books and articles that feature your favorite sports teams, rock stars, hobbies, or television shows. Then you may find that reading is much more fun than you thought.

Finally, make reading aloud a natural part of family life. Share an article, a poem, a letter, or any page from any book with your family, and you may surprisingly find that reading can not only bring happiness to yourself but also to your family.

三、听一段对话，根据所听到的内容和提示词语，记录关键信息。将所缺的关键信息填写在答题卡的相应位置上。对话你将听两遍。

#### China Dream, My Dream

Hi, everyone! As we know, China Dream is the dream of every Chinese. As a student, my dream is to

become a teacher, because I am good at singing, dancing and love children. If I become a teacher, I will work with children, teach them a lot of knowledge and I will be happy.

In order to make my dream come true, I will study harder than before and read a lot of books to get more knowledge at school. I will finish my homework on time at home. From now on, I plan to do more exercise to build me up in my free time. And this can make me feel active to do things. As the old saying goes, "Where there is a will, there is a way." And I believe I will realize my dream one day.

Thank you for listening.
