Feeling tired is very common among teens. What can we do about it? Experts give us some advice.

Learn to relax. Overwork is the main reason why so many students feel tired. Cut down some of the jobs you need to do each day so that you only do the most important things well. Leave time for activities that are relaxing and fun. This might mean reading a good book, listening to the music, going for a walk or taking a relaxing bath. You will feel very good.

Get a good night's sleep. Getting enough sleep helps you keep your body and mind in the best form. If you stay up late and need to get up early the next day, you may not be able to pay attention to the things you need to do. You also feel tired.

Exercise regularly and eat well. Don't rush through your meals. Eat less junk food or fast food. Eat healthy food instead. Fruits and vegetables are necessary.

Get to know pleasant people. Some people are optimistic, while others are not. Choose people who are always full of hope as your friends and spend more time with them and you'll be as happy as them. You'll see everything with the **optimism**.

Have a happy attitude (态度). Your attitude decides the way you see things. Is your cup half full or half empty?

Friends are important in our life, because no one wants to be lonely. However, some people have difficulty in making friends and they often feel lonely. Do you also feel in that way? What's the reason behind that? According to a new study from Chicago University, the reason is that you have brain different from common people. And you often feel unsafe when facing strangers.

Does that mean you have no way to become happy again? Don't worry. Scientists of this study have thought up ways to help you deal with your loneliness. They provided four steps for getting out of loneliness.

The first step is to accept social (社交性质的) invitations although you don't want to go. "It's not enough for people just to get in touch with others online. That's because most people don't show their true selves there," said Dr. Cacioppo, one of this study's scientists. Another step is to make an action plan. As "Actions speak louder than words", you need to be active to communicate with others. You also need to meet people with the same interests. Also, you should be positive, and always think the best from each activity.

After all, "tomorrow is another day". Who knows what good things are waiting for us?
