## 题目②

There are some ways to communicate with others, such as talking face to face, singing songs, using body and sign language, writing a letter, chatting on line, sending text messages.

My friends and I usually have a talk face to face because we live near each other. We often send text messages, too. We can discuss our homework, talk about our interesting games. Sometimes we make phone calls.

I think the best way to communicate is the mobile phone. It is one of the most welcome and useful inventions. After mobile phones appear, communication becomes easier and rapider. With the help of the phones, people can keep in touch with anyone at any time and in any place. (118)
