二、完形填空 (每题 1 分, 共 8 分)

阅读下面的短文, 掌握其大意, 然后从短文后各题所给的 A、B、C、D 四个选项中, 选择最佳选项。

Leo is a seventh grade student. He seldom does well in maths or science, but he can get a high score in spelling tests. Last month he took part in the school spelling competition. The final test took place between Alice and Leo. The 9 would take part in the county spelling bee for their school. When it was Alice's turn to spell the last word, she shook her head. She didn't know how to spell it. Leo quickly and 10 spelt it out. So he got the champion trophy (冠军奖杯).

Alice came up to him and 11 her hand. Leo took no notice and just made a dance in front of her.

After school, Leo's friend Dela said to him, "Leo, you were not polite to Alice! I think you were very rude (粗鲁的) to her. She just wanted to shake your hand and say congratulations."

Leo said, "I didn't mean to hurt her. I was just too 12 to reply to her!" Dela shook her head, "In two weeks, you'll be facing the best of the best in the county spelling bee. You need to prepare yourself well."

Two weeks passed. Leo took part in the county spelling bee. After six rounds, there were only seven players left and Leo was among them. However, Leo had only tried to 13 through the sixth round with a lucky guess.

"Your word is maestro." the host said to Leo.

Leo couldn't remember it and he lost.

Gabe, another player, finally won the final 14. He accepted the trophy with a small bow (鞠躬), and then shook hands with the other players one by one. His action was the complete opposite of Leo's.

"OK," Leo thought to himself, "I get what Dela meant now."

The following Monday at school, Leo found Alice in the lunchroom.

"Do you mind my 15 down?" Leo asked.

"Certainly not." Alice moved her books to one side to make space for him.

"I'm sorry I didn't 16 politely last time. Would you like to be my study partner for the next county spelling bee?"

"Sure. Better late than never." Alice smiled.

The brain is the most interesting part of our body. Even though there's lots of medical research, nobody really understands everything about it. Like the rest of our body, we need to care for our brain. The ways that we keep our minds healthy can be quite simple.

Many people think their brain will slow down with age and their memory will get worse as a result. The truth is, just like your body, you can also improve your mind. Healthy food makes people hopeful to face their lives and helps them keep away from illness. Just as the saying goes, "Having an apple every day keeps the doctor away." We should also know that greens do a body good, and that greens do a mind good, too.

Another way of improving your mind is to exercise often. Exercise has many good points, and it is also good for the mind. Some studies show that physically active people are much healthier than those who never exercise. Besides that, they have a lower danger of Alzheimer's disease (阿尔兹海默症). Try to exercise several times a week for 30 to 60 minutes. For example, you can walk, swim, play tennis or do any other activity that makes your heart beat fast. That will help you to have an active mind.

You should also get plenty of sleep to improve your mind. Sleep plays an important role in your brain health. Some scientists say that sleep helps clear abnormal proteins (异常蛋白) in your brain and makes your brain healthy. Seven to eight hours of sleep one night may be good for you. A good sleep gives your brain the time to stay strong and have good memories.

Try to pay more attention to your mind, eating a balanced diet (均衡饮食), getting a good night's sleep and taking regular exercise are all important ways of looking after both your body and your brain.

26. According to the passage, people should eat healthy food because _____.
- A. they want to slow down their growing
 - B. they really hope to do more in their lives
 - C. healthy food can help them sleep more time
 - D. healthy food can improve their body and mind

27. What do you know about the brain from the passage?
- A. People know everything about their brain clearly.
 - B. The apple can keep the brain away from illness.
 - C. We can improve our mind by exercising often.
 - D. The more you sleep, the cleverer you will be.
28. What is the passage mainly about?
- A. How to sleep well at night.
 - B. Ways to improve your mind.
 - C. The importance of the mind.
 - D. Some good points of exercise.

第二部分

本部分共 5 题，共 20 分。根据题目要求，完成相应任务。

四、阅读表达（第 29-31 题每题 2 分，第 32 题 4 分，共 10 分）

阅读短文，根据短文内容回答问题。

People learn in different ways. When a person knows how he learns best, he will learn easier and faster. It will improve his work and how he works with other people. Many people ask me, "What's the best way to learn?" To tell the truth, there isn't one correct answer because people have their own learning ways. Here are the learning ways.

Learning by rules. These people need to have rules and explanations to understand new materials. Once they find or are given a rule and use it, they will learn more effectively (有效地).

Learning by doing. These people learn more effectively if they have a chance to use their hands or body. They don't like reading explanations. They like doing more than just reading the information.

Learning by seeing. These people can understand better once they see a picture, a table, or a real object. Pictures or photos help them remember new materials. When they try to remember the information, they will remember the picture or photo first.

Learning by hearing. These people like to listen to songs and voices instead of just seeing or reading something. It is easy for them to memorize information if they listen to someone talk about it.

Learning alone. These people prefer learning alone. They won't feel comfortable unless they study in a quiet room. If they can relate (联系) the knowledge to themselves, they will learn faster.

Learning with others. These people like to communicate with others. They like to work in groups. Once they have a chance to discuss the subject with other people, they can understand it better.

Most people don't use one learning way; they use different ways to learn. The only difference is that one person may prefer one way to another.

29. Is there one correct answer to the best way to learn?
 30. How many learning ways are there in this passage?
 31. How can they understand better for the people learning with others?
 32. What kind of learning way do you prefer? And why?
