C

Sometimes I really wonder whether there is love between my parents. Every day they are very busy trying to make money for my schooling.

One day, my mother was making a new hat for me. I silently sat beside her.

"Mum, is there love between you and Dad?" I asked in a very low voice.

With surprise in her eyes, she stopped her work for a while. Then she said, "Susan, look at this thread(线). It can hardly be seen, but it's really there. It makes the hat strong. If life is a hat, love should be a thread. Love is inside.

At that time, I couldn't understand her until the next spring. At that time, my father suddenly got sick seriously. My mother had to stay with him in the hospital for a month.

After they were back, my mother helped my father walk slowly on the country road every day. They were so kind to each other and it seemed they were the happiest couple.

After two months my father still couldn't walk by himself.

"Dad, how are you feeling now?" I asked him one day.

"Susan, don't worry about me." He said. "I just like walking with your mum. I like this kind of life." Reading his eyes, I knew he loves my mother deeply.

Now I understand that love is just a thread in the hat of our life. Love is inside, making life strong and warm.

36. Why are Susan's parents busy trying to make money?
 A. To send Susan to school. B. To get to see the doctor.
 C. To buy a strong hat. D. To show their love.
37. Susan's father stayed in hospital for _____.
 A. one day B. one month C. two months D. three months
38. Susan came to understand her mother _____.
 A. while her mother was making a hat
 B. before her father was in hospital
 C. when she was sitting beside her mother
 D. after her father was seriously sick
39. What can we know from the passage?
 A. Susan's father is not very busy. B. Susan's mother is a nurse.

C. Susan's parents love each other. D. Susan doesn't like her father.

D

There are many colors in nature. But do you think that a color has weight(重量)? I think you'll say "no". But I am afraid you are wrong. If you don't believe it, you may do a small experiment(实验).

First, put two objects(物体) with the same weight into two boxes. Then cover the boxes. Third, wrap(包裹) one box with a red piece of paper, the other with a white piece of paper. OK. Now hold the boxes with your hand one by one. It is certain that you will think the red one is a little heavier.

Why do you think so? A scientist found that different colors have different weights in a man's mind. So he did many tests and at last he got the result. That is to say, every color has its own weight in our mind.

The scientist told us that colors also have smell. Can you smell the color? Of course not. Then why did the scientist say so? That is because every color stands for a kind of light with a certain wave length. It reaches our brain through sense organs(器官).

According to this discovery, scientists say that people accept the colors they like, and refuse the colors they hate. So your body and mind will be healthy by using the colors you like. Or you'll be nervous or even get ill. For example, you like blue and hate red. If you stay in a room with red windows, wallpaper and furniture for two hours, you'll feel you have been there for four hours. But if the room is blue, you'll feel you have been there for only an hour. And, if a person walks out of a blue room and into a red room, his temperature will rise(上升). That means our body temperature will change with different colors.

- 40. From the experiment, we know that _____.
 - A. the red box is heavier than the white one
 - B. colors can change the weight of an object
 - C. colors have different weights in people's mind
 - D. the white piece of paper is lighter than the red one

- 41. When we walk from a red room into a blue one, _____.
 - A. we will feel very nervous
 - B. our body weight will change
 - C. we will smell different colors
 - D. our body temperature will be different

42. This passage is probably ____.

- a science report
- a sports report
- a story
- a news report

Jim Robery is a firefighter in the US. He tells us about his life. 44. We live in a room with seven other firefighters. Every day we get up at 5:20 and then we tidy our room. It is boring, but we have to do it. At 6:00, training starts with team exercise. There are 39 firefighters in our team.

One hour later, we have our breakfast. We have to eat very fast because we do not have much time. Then we run at 8:30 in the morning. We always run 5 km. It's not easy at all.

We have lunch at 12:00. After lunch, we can get some rest. At 14:00, the team goes for skills training. We practice 3 skills: driving, firefighting and commuting. Every day, after dinner, we have some free time. The team usually goes to bed at 22:00.

5 Well, this is our life when things are fine. If there is a fire or someone calls 911, we have to stop everything and get out fast. We must try our best to keep everyone safe. Things can be dangerous and difficult, but I think I have an important and interesting job!
