题目①

Dear heroes,

I'm writing this letter to express my sincere thanks to all of you for your hard working. Recently, as volunteers in our community, you are busy organizing people to stand in a line and checking identification of them when they need to take a Covid test.

I am so proud of you. I want to express my respect for you because of your patience, kindness and the selfless spirit.

From what you did, I've learned that I could do many things to serve people and make my efforts to help others. In a word, please accept my thanks and my best wishes for you.

Your sincerely,

Li Hua

题目②

Going Green Starts with Small Things

Everyone can make small changes in lifestyle and make a difference to reduce pollution and waste. In my daily life, I usually take a bus instead of taking a car, which promotes a low-carbon life. In order to save electricity, I always turn off the lights immediately when I leave the house and the classroom. Besides, I always do my best to save water and food in the daily life, such as reusing the rice water to water the flowers.

As we all know, the electricity, water and food are all important and necessary resources for us to live. What's more, they are limited, so we do have the responsibility to save them.

I'm very happy and proud that more and more people join me to make our environment better. Going green starts with small things. Let's take actions from now on.
